

How to use Codex

Source 1 - <https://www.youtube.com/watch?v=EwVs3O2Zm6I>

Parallelization

Use codex web version and in different chats assign issues to codex and let it work in different branches

<https://youtu.be/EwVs3O2Zm6I?t=619>

Watch from 10:20 to 14:00

Agents

Create an agent and write all important tasks in it

- Writing legible and well documented code
- Writing tests for the code
- Working on a separate branch and writing a PR
- And more if needed

Make sure this file is as small as possible to reduce token usage.

Skills

For specific tasks like frontend or backend create skill files.

Details

- Write detailed issues/prompts
- Do not let any vague ideas seep in
